Established Guide to Publishing in the Sciences Gets New Edition

Eighth edition of How to Write and Publish a Scientific Paper debuts this month

Santa Barbara, Calif. (March 3, 2016) – Though writing and publishing journal articles is an essential aspect of a successful scientific career, many scientists find the process intimidating and confusing. [*How to Write and Publish a Scientific Paper: Eighth Edition*](#), publishing this month from Greenwood, updates and expands on the content of its trusted prior editions to offer scientists the information and strategies necessary to effectively prepare articles for publication in today’s academic journals.

By providing practical, readable, and sometimes humorous guidance, [*How to Write and Publish a Scientific Paper*](#) enables researchers to gain the knowledge, skills, and confidence to succeed in communicating about their work. The authors not only guide readers in the craft of scientific writing—broken down into the separate tasks of writing the respective sections of a scientific paper and then publishing the paper—but also address important related psychological, ethical, logistical, and cultural considerations in communicating about science.

In publication since 1979, [*How to Write and Publish a Scientific Paper*](#) has evolved to become the definitive authority on its subject matter. Its most recent addition garnered widespread acclaim, with the Journal of the American Academy of Child and Adolescent Psychiatry asserting, “It will become your ‘go-to’ book for general questions about scientific publication and presentation.” Guided by direct insight from users including professors and students, authors Barbara Gastel and Robert A. Day have updated and expanded the guide’s coverage for a new eighth edition, addressing timely concerns such as predatory journals and how to increase visibility and access post-publication.

[*How to Write and Publish a Scientific Paper: Eighth Edition*](#) (hardcover, \$61.00; paperback, \$35.00) is available for direct purchase at www.abc-clio.com and through all major distributors.
